Patient Name:
Consent to Undergo MRI During Pregnancy
I hereby acknowledge that Advanced Imaging Center, LLC., ("AIC") through one of its representatives has discussed with me the issues concerning an MRI during my pregnancy. Specifically, it has been explained to me that:
1. MRI is a technique to look inside the body without using ionizing radiation. I will lie on a table for 60-90 minutes while pictures are being taken using magnetism and radio frequency waves. The MRI study will not require any injections or anesthesia, but if sedation is needed, I will be informed and allowed to consent.; and
2. Because an MRI uses magnetism and radio frequency waves, known risks include, damage to heart pacemakers and injury due to the presence of metal objects inside a persons body or in the examining room. Because MRI imaging is so new, the effects of an MRI on pregnant women, either to the mother or her fetus are NOT KNOWN. No conclusive research has been performed. Therefore, neither AIC and or any person acting on behalf of AIC, can exclude the possibility that there may be short-term or long-term hazards. In other words, AIC and persons acting on behalf of AIC do not know whether either my baby or myself will be damaged by an MRI.
AIC and/or persons acting on behalf of AIC have answered ANY AND ALL questions that I may have had. My risks and the risk to the fetus have been fully explained so that I may make an informed decision with regard to the MRI procedure. I further understand that I may contact AIC for any future questions I may have about this test.
After being given sufficient time to consider the benefits and risks of the MRI, specifically considering my pregnancy, any other medical condition that I may have and the unknown possibility of damage to me or my baby, I hereby consent on behalf of myself and my fetus to undergo the MRI procedure. I do not have a pacemaker or any dangerous implanted metal objects.
That by signing this document, I agree that I have read and understand the warnings within. I release Advanced Imaging Center, Inc., its agents, officers, directors and employees from any and/or all liability with regards to my pregnancy and this service.

Questionnaire & Consent for the Injection of Intravenous Contrast

Some patients are at higher risk for experiencing an allergic reaction or kidney damage. The following questions will help our physicians determine the best contrast agent for your particular study or if additional medication should be given.

Are you over 60?		
	Yes	No
Have you ever received x-ray contrast material?	Yes	No
If yes, did you ever have a reaction to the contrast?	Yes	No
Are you diabetic? Yes_ No_ Do you take insulin?	Yes	No
Are you taking (or have you taken) the drug GLUCOPHAGE (Metformin)?	Yes	No
Do you have asthma?	Yes	No
Are you allergic to any food or medication?	Yes	No
If yes, please tell us which:		
Do you have any history of renal disease, including dialysis, kidney transplant, single kidney, renal cancer, renal surgery?	Yes	No
Do you have a history of hypertension requiring medical therapy?	Yes	No
Do you have Multiple Myeloma (bone cancer)?	Yes	No
Do you have Sickle Cell Anemia?	Yes	No
Do you have Polycythemia (excess in red blood cells)?	Yes	No
Are you currently taking any medications?	Yes	No
If yes please list:		
Are you pregnant?	Yes	No
Your doctor has requested an examination that requires an intravenous injection media). This contrast us used to visualize blood vessels and body organs. CONSENT FOR RADIOLOGY PROCEDURE

Patient Name:			
INTRODUCTION:			
Your physician has requested that you undergo a procedure known as a:			
This procedure is being performed to further evaluate and/or treat your dia	agnosis of:		
We are asking you to read and sign this form so that we can be sure you un associated with this procedure. Please ask questions about anything on this	nderstand the risks and complications potentially s form that you do not understand.		
DESCRIPTION OF PROCEDURE This procedure involves the placement of a fine needle through your skin and into a designated location. Some numbing medicine will be injected in the skin over the site that will be used before the needle is inserted. Medications may also be given to you to make you more comfortable and relaxed. This is known as conscious sedation. Following insertion, the needle will be guided into position with a camera, using x-rays (fluoroscopy or CT), sound waves (ultrasound) or magnetic signals (MRI). The position of the needle may be confirmed by the injection of x-ray contrast material (x-ray dye) and/or removal of fluid. It may be necessary to make more than one pass of the needle to achieve the proper location. Depending on your condition, a drainage tube may be placed, a tissue sample taken or material injected through the needle. The specific procedure planned for your condition is:			
RISKS: Risks associated with the procedure include pain or discomfort at the need vessel, organ puncture, infection which may result in an infection of the ble (embolization), and stroke. Risks associated with the x-ray contrast materia function. The medications used for the conscious sedation are associated w your lungs) or respiratory depression. In addition to these potential risks as and the conscious sedation medications, there may be other unpredictable in ALTERNATIVES: There may be other procedures that can be performed to further evaluate and having this procedure performed places discuss the contract the results and the conscious sedation medications.	old stream, the development of a blood clot all include an allergic reaction and reduced kidney with the risks of aspiration (inhaling food or liquid into sociated with the procedure, the x-ray contrast material, risks including death.		
naving this procedure performed, please discuss these other alternatives wi	th your physician.		
AGREEMENT:			
The information on this form was explained to me by had the opportunity to ask my physician any other questions I might have a the associated risks, and the alternatives to the procedure. I have voluntarily the risks. I agree that if deemed necessary that submission of tissues may be addition, I am aware that no guarantee or assurance has been made as to the	y agree to have the procedure performed and accept

CONSENT TO MEDICAL OR SURGICAL CARE AND TREATMENT

NOTE TO PATIENT: There are risks involved in any procedure or treatment. It is not possible to guarantee or give assurance of a successful result. It is important that you clearly understand and agree to the planned surgery or treatment. I authorize Dr. Ray Hashemi, M.D. and such physicians, associates, assistants and other personnel or the hospital or medical facility chosen by him or her to perform the following (IN MEDICAL TERMS KNOWN AS): (IN COMMON TERMS KNOWN AS) and/or to do any other procedures that in their judgment may be advisable to my well-being, including such procedures as are considered medically advisable to remedy conditions discovered during the above procedure. • GENERAL RISKS AND COMPLICATIONS. I am satisfied with my understanding or the more common risks and complications of the treatment or procedure which are described generally on the back of this form. These risks include the risk of bleeding, infection, pain, anesthesia risks and death. • SPECIFIC RISKS AND COMPLICATIONS. I am satisfied with my understanding of specific risks of this procedure or treatment including (Doctor to describe specific risks where applicable): • ALTERNATIVE METHODS OF TREATMENT. I am satisfied with my understanding of alternative procedures or treatments and their possible benefits and risks including (Doctor to describe specific alternative procedures and complications where applicable): • NO TREATMENT. I am satisfied with my understanding of the possible consequences, outcomes or risks if no treatment is rendered. • SECOND OPINION. I have been offered the opportunity to seek a second opinion concerning the proposed treatment or procedure. ADDITIONAL OR DIFFERENT PROCEDURES DURING CARE AND TREATMENT. I understand that conditions may arise which are unforeseen at this time and that it may be necessary and advisable to perform operations and procedures different from, or in addition to, the procedure described. I authorize and consent to the performance of such additional or different operations and procedures as are considered necessary and advisable. • OTHER SERVICES. I consent to the performance of pathology and radiology services as needed and I further authorize the disposal of any severed tissue or member in accordance with customary hospital or medical facility practice. • PHOTOGRAPHY. I consent to the photographing, filming or videotaping of the treatment or procedure for educational or diagnos-• NO GUARANTEES. I understand there are risks involved in any procedure or treatment, and it is not possible to guarantee or give assurance of a successful result. • OTHER QUESTIONS. I am satistied with my understanding of the nature of the procedure or treatments and all of my additional questions about the treatment or procedure have been answered. I have read and been given a copy of this form. _____TIME _____ AM/PM PRINT PATIENT NAME: SIGNATURE: ___ (PATIENT, PARENT OR LEGAL GUARDIAN) TRANSLATED BY (IF APPLICABLE): ____ PHYSICIAN:___ WITNESS:___

Patient Name:
Informed Consent for Oral Sedation
Valium (diazepam) is a medication that can greatly minimize anxiety and stress that may be associated with claustrophobia. Even though it is safe, effective, and wears off after the MRI visit, you should be aware of some important precautions and considerations:
1. This consent form and all other paperwork should be signed before you take the medication.
2. The onset of diazepam is about 15 to 30 minutes. Do not drive after you have taken the medication. The peak effect occurs between 1 and 2 hours. After that, it starts wearing off and most people feel normal after 6 to 8 hours. For safety reasons and because people react differently, you should not drive or operate machinery the remainder of the day. Wait until tomorrow.
3. You must have someone drive you to and from your appointment. If you cannot arrange a ride, you cannot take the medications, no exceptions.
4. This medication should not be used if:
 a. you are hypersensitive to benzodiazepines (Xanax, Ativan, Versed, Halcion, etc.) b. you are pregnant or breast feeding c. you have liver or kidney disease d. you have a history of drug and/or alcohol abuse
5. Tell the doctor if you are taking any medications-either by prescription or over-the-counter. Of course, taking recreational/illicit drugs can also cause unwanted and unexpected reactions.
6. Side effects may include light-headedness, headache, dizziness, visual disturbances, amnesia, and nausea. In some people, oral diazepam may not work as desired.
7. You should not eat heavily prior to your appointment. You may take the medication with a small amount of food, such as juice, toast, etc. Taking it with too much food can make absorption into your system unpredictable.
8. On the way home from the office, your seat in the car should be in the reclined position. When at home, lie down with your head slightly elevated. Someone should stay with you for the next several hours because of possible disorientation and possible injury from falling.
I understand these considerations and am willing to abide by the conditions stated above. I have had an opportunity to ask questions and have had them answered to my satisfaction.
